

Vision

Our vision is to be leading Core Lab by providing specialized research services for scientific staffs , graduate students, and knowledge-based communities to perform research projects in the national and international scale.

Mission

An important cornerstone of the Core Research Laboratory is to provide a first-rate scientific infrastructure and easy access to the latest technology. Core Research Laboratory is committed to the development, implementation and optimization of cutting-edge methodologies and instrumentation for the benefit of research programs. This not only promotes interdisciplinary research but also enables investigators to take advantage of the readily available expertise to expand their own research into new areas. What would take months and years elsewhere is often accomplished within days and weeks at Core Research Laboratory.

Aims and Future plans

The development of well-equipped laboratory in developing countries is an urgent need .Core Research Laboratory of Tabriz University of Medical Sciences as one of the few comprehensive laboratories in the country provides a scientific environment and essential cutting edge technology to cover the needs of researchers and interested students. The lab welcomes researchers by providing the new technology at the lowest cost and is always working to preserve and expand this valuable achievement.
